Rating Scale	Very Good	Good	Fair	Unsatisfactory	Reviewer Guidance :
Rating explanation	The report can be used with high level of confidence and is considered a good example.	The report can be used with certain degree of confidence.	Partially meets requirements with some missing elements. The report can be used with caution.	Misses out the minimum quality standards.	<ul style="list-style-type: none"> <li>- Overall reports are rated against a four-point scale (Very Good, Good, Fair and Unsatisfactory), which is an aggregated rating of eight parameters.</li> <li>- Each overarching parameter is rated against a four-point scale (Fully, Mostly, Partially and Not at all).</li> <li>- Parameters such as evaluation methodology, findings, conclusions and recommendations are given more weight.</li> <li>- <b>Executive feedback</b> - provide summary of the extent to which the report meets or fails to meet the criteria provided under each parameter. Please also include suggestions on how to improve future evaluation practice. The overall review, rating and executive feedback will be provided to the evaluation commissioning office.</li> </ul>

PART II: THE EIGHT KEY PARAMETERS		
<b>SECTION 1: OBJECT AND CONTEXT OF THE EVALUATION (weight 5%)</b>	<b>RATING</b>	<b>Very Good</b>
<b>Does the report present a clear and full description of the 'object' of the evaluation?</b>	<b>75%</b>	<b>Executive Feedback on Section 1</b>
<p>1.1 The report clearly specifies the <b>object</b> of the evaluation, and provides a clear and complete description of the intervention's original logic (e.g. expected results chain or theory of change), timeframe, intended beneficiaries by type, geographic location(s) as well as the planned budget of the intervention.</p> <p><i>Note: Please address all aspects of this sub-criteria. If the project did not have a ToC, clearly outline the expected results of the intervention and how the activities were expected to lead to the results.</i></p>	Mostly	The description of the intervention is summarized but contains the descriptions of most elements. Information on the geographical location and the planned budget should have also been included upfront. The context is well described and information on the partners and stakeholders is complete. Information on the implementation status of the project should have also been included.
<p>1.2 The <b>context</b> includes factors that have a direct bearing on the object of the evaluation: social, political, economic, demographic and institutional. This also includes explanation of the contextual gender equality and human rights issues, roles, attitudes and relations.</p> <p><i>Note: This section should be concise but sufficient to cover key contextual issue.</i></p>	Fully	
<p>1.3 The <b>key stakeholders</b> involved in the implementation, including the implementing agency(ies) and partners, other stakeholders and their roles are described.</p> <p><i>Note: Remember to include not only a list of partners but also a description of their main activities and/or the role they had in the implementation of the intervention in the body of report. Detailed description and stakeholder analysis can be provided in annexes.</i></p>	Fully	
<p>1.4 The report identifies any changes in the <b>timeframe and/or implementation plans</b> (e.g. original plans, strategies, logical frameworks), provides an explanation for these and for any implications these may have had regarding the evaluation.</p> <p><i>Note: Remember to identify the implementation status of the object, including its phase of implementation and any significant changes.</i></p>	Partly	
<b>SECTION 2: PURPOSE, OBJECTIVES AND SCOPE (weight 5%)</b>	<b>RATING</b>	<b>Very Good</b>
<b>Are the evaluation's purpose, objectives and scope sufficiently clear to guide the evaluation?</b>	<b>100%</b>	<b>Executive Feedback on Section 2</b>
<p><b>2.1 Purpose, objectives and use of evaluation:</b> The evaluation report provides a clear explanation of the purpose and the objectives of the evaluation, including the intended use and users of the evaluation and how the information will be used.</p>	Fully	The purpose, objectives, use and the evaluation scope are clearly outlined.
<p><b>2.2 Evaluation Scope:</b> The evaluation report provides a clear description of the scope of the evaluation, including a description of the timeframe and outputs/outcomes covered, and not covered (thematically, geographically etc.) as well as the reasons for this scope (e.g. specifications by the ToR, lack of access to particular geographic areas for political or safety reasons at the time of the evaluation, lack of data/evidence on particular elements of the intervention).</p>	Fully	
<b>SECTION 3: METHODOLOGY (weight 15%)</b>	<b>RATING</b>	<b>Very Good</b>
<b>Is the methodology used for the evaluation clearly described and appropriate, and the rationale for the methodological choice justified?</b>	<b>97%</b>	<b>Executive Feedback on Section 3</b>
<p><b>3.1 Methodology:</b> The report provides a complete description of the methods used for data collection and analysis, the chosen evaluation criteria and evaluation questions, and demonstrate that the methods chosen are appropriate to inform the responses to the criteria and questions.</p> <p><i>Note: An evaluation matrix containing the evaluation questions in each evaluation criteria, the indicators, the data sources and methods for data collection is useful to show these, but it is still important to include some explanations in the body of the document to clearly demonstrate that the methods are appropriate for triangulation. Remember to keep this section succinct and use annexes to provide detailed information.</i></p>	Fully	The methodology is well summarized and the detailed information in the Annex helps to show that the methods were appropriate to provide responses to evaluation questions. The methods seem appropriate for the triangulation, analysis and assessments of GE/HR specific results. Information about the sampling strategy is complete reassuring the reader that the coverage was appropriate. References to adherence to ethics and specific evaluation standards (e.g. UNEG guidelines) during the evaluation are included. Information on limitations should have been clearly outlined.

<p><b>3.2 Data collection, analysis and sampling:</b> The report clearly describes the tools used for data collection and the rationale for their selection as well as the sampling strategy and methods used for data analysis. The report includes discussion of how the mix of data sources was used to obtain a diversity of perspectives, to guide the assessments of GE/HR specific results and to ensure data accuracy and completeness.</p> <p><i>Note: Please describe not only the types of data collection tools used (e.g. surveys, KIs, desk review) but also how the data was collected (where, when, who, how) and what steps were taken to analyze it. Remember to include a description of original sampling strategy and the extent to which it covers the range of stakeholders involved in the intervention, with a clear justification of the selection of the targeted sample. Use annexes to provide detailed description.</i></p>	Fully
<p><b>3.3 Stakeholders Consultation:</b> The evaluation report gives a complete description of the stakeholder consultation process in the evaluation, including the rationale for selecting the particular level and activities for consultation.</p> <p><i>Note: Include a stakeholder mapping, showing that the consultation process was comprehensive to assure the reader that the selection of KIs and/or survey participants was appropriate and representative of the universe of project stakeholder (in line with descriptions under item 1.3 above). Use annexes to provide detailed description.</i></p>	Fully
<p><b>3.4 Limitations:</b> The report presents a clear and complete description of limitations and constraints faced by the evaluation and if/how these were mitigated (e.g. gaps in the evidence, biases due to limits in stakeholder consultations, etc.).</p>	Partly
<p><b>3.5 Ethics:</b> The evaluation report makes explicit references to the ethical obligations of the evaluators and shows evidence that data collection and tools adhered to these ethical principles, (e.g. mechanisms and measures were implemented to ensure that the evaluation process conformed to relevant ethical standards, including but not limited to, informed consent of participants, confidentiality and avoidance of harm considerations).</p> <p><i>Note: Mentioning/referencing UNEG standards in the report does not amount to sufficient evidence that the data was actually collected with sensitivity to ethics and discrimination. It is a good practice to provide a clear explanation as to how the evaluation adopted these, showing examples of tools and processes used were sensitive to ethical considerations (e.g. consent, confidentiality) and were not discriminatory against particular group's participation (i.e. were interviews or focus groups held in a location, at a time, in a setting, using language/translation, that is appropriate and respectful; and facilitates the participation of a full range of stakeholders). Use annexes to provide detailed description.</i></p>	Fully

SECTION 4: FINDINGS (weight 20%)	Rating	Very Good
Are the findings well substantiated, clearly presented, relevant and based on evidence?	87%	Executive Feedback on Section 4
<p>4.1 Findings are presented with clarity, logic and coherence (e.g. avoid ambiguities).</p> <p><i>Note: It is a good practice to clearly outline the findings in the report, preferably using a "set" of findings statements, with clear articulation and conciseness, followed by substantiation and full demonstration of the evidence used to formulate the findings' statements.</i></p>	Fully	<p>The report is not structured around findings statements, but the analysis is comprehensive and these could have been easily articulated. The report contains clear and provide direct responses to the evaluation criteria. The findings are consistent with the narrative, which supports the statements putting forward quality\ evidence. Overall, the findings are based on in-depth analysis and but more detailed information about the project activities and how results were achieved should have been included. More details and explanations of cause-effect should have also been included to explain the results of the project and of the surveys undertaken.</p>
<p>4.2 The evaluation findings are <b>well substantiated, and provide sufficient levels of high quality evidence</b> to systematically ad-dress the evaluation questions and criteria.</p> <p><i>Note: Ensure the findings narrative are consistent with the findings statements and fully back the statement, showing the evidence and triangulation clearly.</i></p>	Fully	
<p>4.3 Findings reflect systematic and <b>appropriate analysis</b> and interpretation of the data; they are free from subjective judgments.</p> <p><i>Note: in addition to describing the implementation of activities and completion of outputs, include an analysis of their contributions towards the intervention outcomes.</i></p>	Mostly	
<p>4.4 Are <b>cause and effect links</b> between an intervention and its end results explained and any unintended results highlighted?</p> <p><i>Note: Remember to include information on both the cause/effect links and unintended results</i></p>	Mostly	
SECTION 5: CONCLUSIONS AND LESSONS LEARNED (weight 20%)	Rating	Very Good
Are the conclusions clearly presented based on findings and substantiated by evidence?	80%	Executive Feedback on Section 5
<p>5.1 Conclusions are well substantiated by the evidence presented and are logically connected to evaluation findings.</p> <p><i>Note: Conclusions are not summaries of findings but they are formulated from the analysis and interpretation of the findings, giving meaning to them.</i></p>	Fully	<p>Conclusions provide a good summary and are logically connected to the findings, but should have presented a better balance of the strenghts and weaknesses identified (currently highlighting the strenghts mostly). The conclusions should have also gone beyond the findings and contain more analysis, adding more insights, paving the way to the recommendations that follow. A good set of Lessons are included but not all lessons clearly articulate the project experience and explain how they could be applicable to other contexts.</p>
<p>5.2 The conclusions reflect reasonable evaluative judgments that add insight and analysis beyond the findings.</p> <p><i>Note: Conclusions should provide explanations for the findings and form the basis for recommending actions or decisions that are consistent with the conclusions.</i></p>	Mostly	
<p>5.3 Conclusions present the <b>strengths and weaknesses</b> of the object (policy, programmes, projects or other intervention) being evaluated, based on the evidence presented and taking due account of the views of a diverse cross-section of stakeholders.</p>	Mostly	
<p><b>5.4 Lessons Learned:</b> When presented, the lessons learned section stems logically from the findings, presents an analysis of how they can be applied to different contexts and/or different sectors, and takes into account evidential limitations such as gen-eralizing from single point observations.</p> <p><i>Note: The lessons learned from an evaluation comprise the new knowledge gained from the particular circumstance (initiative, context outcomes and even evaluation methods) that is applicable to and useful in other similar contexts. They should demonstrate the intervention experience and be generalized to enable applicability by other interventions.</i></p>	Mostly	
SECTION 6: RECOMMENDATIONS (weight 15%)	Rating	Good
Are the recommendations relevant, useful, actionable and clearly presented in a priority order?	70%	Executive Feedback on Section 6

<p>6.1 Recommendations are well grounded on the evaluation, logically <b>derived from the findings and/or conclusions</b>.</p> <p><i>Note: The recommendations should be complete in number and depth, reflecting the analysis in the findings and conclusions and address the issues identified earlier.</i></p>	<p>Mostly</p>	<p>The recommendations relate to the findings and conclusions but need to contain more explanations and details regarding their rationale. The are also too presented in a very summarized way and should have included a set of detailed action-oriented steps, clearly explaining what should be implemented and how the implementation should take place. There are references to the process and the recommendations are prioritized.</p>
<p>6.2 The report <b>describes the process</b> followed in developing the recommendations including consultation with stakeholders.</p> <p><i>Note: Include a relevant explanation on the extent to which the evaluation participants were specifically consulted for the formulation of the recommendations and/or the level of participation of stakeholders in this evaluation stage.</i></p>	<p>Fully</p>	
<p>6.3 Recommendations are clear, realistic (e.g. reflect an understanding of the subject's potential constraints to follow-up) and actionable.</p>	<p>Partly</p>	
<p>6.4 Clear <b>prioritization and/or classification</b> of recommendations to support use.</p>	<p>Fully</p>	

SECTION 7: GENDER AND HUMAN RIGHTS (weight 15%)	Score	Meets Requirements
<p>Does the evaluation meet UN SWAP evaluation performance indicators? Note: this section will be rated according to UN SWAP standards.</p>	100%	Executive Feedback on Section 7
<p>7.1 GEWE is integrated in the <b>evaluation scope</b> of analysis and evaluation criteria and questions are designed in a way that ensures GEWE related data will be collected.</p> <p><i>Note: Refer to the UNEG UN-SWAP Evaluation Performance Indicator Technical Note for guidance on this section.</i></p>	Fully integrated (3)	<p>GEWE is fully integrated in the evaluation scope. Gender is an evaluation criterion and evaluation questions related to gender/HR are included. The methodology was fully regarding gender-responsiveness since it used mixed data collection methods and references to confidentiality and ethical guidelines are included. There are also references to collection of gender-disaggregated data and details about tools or other mechanisms used as part of gender-responsive methodology. Gender analysis is fully reflected in the report. The Background section contains analysis of the gender issues, the findings contain solid gender-related analysis. Unanticipated effects were not specifically identified and GEWE aspects are also included in the conclusions. The recommendations mostly tackle operational issues related to the implementation of a gender-related project.</p>
<p>7.2 A <b>gender-responsive methodology</b>, methods and tools, and data analysis techniques are selected.</p> <p><i>Note: it is not enough to simply describe the methodology as "gender-responsive", it is important to demonstrate that the data collection and analysis integrated gender considerations; that data was collected disaggregated by sex; that methods/tools were designed to enable GEWE assessments; and/or that processes employed (i.e. sampling, triangulation, validation) ensured inclusion and enabled data for GEWE analysis.</i></p>	Fully integrated (3)	
<p>7.3 The evaluation findings, conclusions and recommendation reflect a gender analysis.</p> <p><i>Note: Please address all aspects of this sub-criterion.</i></p>	Fully integrated (3)	
SECTION 8: THE REPORT PRESENTATION (weight 10%)	Rating	Very Good
<p>Is the report well structured, written in accessible language and well presented?</p>	80%	Executive Feedback on Section 8
<p>8.1 Report is <b>logically structured, concise and of reasonable length, well written and presented</b> with clarity and coherence (e.g. the structure and presentation is easy to identify and navigate (numbered sections, clear titles and subtitles, context, purpose and methodology would normally precede findings, which would normally be followed by conclusions, lessons learned and recommendations) and is written in accessible language with minimal grammatical, spelling or punctuation errors.</p> <p><i>Note: Reasonable length for project/programme and CPE evaluations is about 40 pages (excluding Annexes 60 pages); and 50 pages for institutional and thematic evaluations (excluding Annexes 60 pages).</i></p>	Mostly	<p>Report is complete and contains appropriate structure. There are some missing pages and little issues with formatting. The report is also long (71 pages excluding Annexes) and should have been shortened (to about 40 pages) to encourage evaluation use. Some key annexes are included but the ToRs, the list of people consulted and the evaluation questionnaires should have also been added to the Annex. Opening pages are complete and the executive summary is a stand-alone section.</p>
<p>8.2 The <b>title page and opening pages</b> provide key basic information on the name of evaluators and, timeframe of the evaluation, date of report, location of evaluated object, names and/or organization(s) of the evaluator(s), name of organization commissioning the evaluation, table of contents including, as relevant: tables, graphs, figures, annexes-; list of acronyms/abbreviations, page numbers.</p>	Fully	
<p>8.3 The Executive Summary is a stand-alone section that includes an overview of the intervention, evaluation purpose, objectives and intended audience, evaluation methodology, key findings, conclusions and recommendations. The Executive summary should be reasonably concise.</p> <p><i>Note: Executive Summaries should be maximum 5-6 pages long.</i></p>	Fully	
<p>8.4 <b>Annexes</b> should be of reasonable length and include, when not present in the body of the report: ToR, evaluation matrix, list of interviewees, list of site visits, data collection instruments (such as survey or interview questionnaires), list of documentary evidence. Other appropriate annexes could include: additional details on methodology, copy of the results chain, information about the evaluator(s).</p> <p><i>Note: Annexes should be maximum 60 pages long.</i></p>	Partly	
Additional Information		
<p>Identify aspects of <b>good practice</b> of the evaluation</p> <p><i>Note: This section is to be populated by the QA Reviewer only, based on the overall Evaluation Report. No need to identify specific elements related to this section.</i></p>	N/A	

<p>[Piloting] SECTION 9: DISABILITY INCLUSION (weight: 5%)  * The score for Section 9 will be 'bonus points' ( 5%), on top of the existing 100% weight.  ** Assessment is based on the UN Disability Inclusion (For further details, please refer to Technical Notes on Entity Accountability Framework).</p>	<p>SCALE (No, Partially, Yes)</p>	<p>OVERALL ASSESSMENT for DISABILITY INCLUSION (Missing, Partial, Sufficient)</p>
<p>Does the evaluation include consideration of disability inclusion?</p>		<p>Partial</p>
<p>9.1 The evaluation <b>questions</b> include references to disability inclusion.</p>	<p>No</p>	<p>Qualitative Feedback (Please highlight any findings on disability inclusion): Disability inclusion is not specifically included in the evaluation questions. The methodology contains references (but no details) related to the inclusion of people with disabilities in the sample of KIs and the topic was referenced in the findings and recommendations, even though analysis was not comprehensive.</p>
<p>9.2 The evaluation <b>methodology</b> includes references to disability inclusion.</p>	<p>Partially</p>	
<p>9.3 The Evaluation <b>findings, conclusions and/or recommendations</b> contain references to disability inclusion.</p>	<p>Partially</p>	

PART III: THE OVERALL RATING

Key Guiding Question	Total weighted score %	Overall Rating	Other reviewer's comments
Is this a credible report that addresses the evaluation purpose and objectives based on evidence, and that can therefore be used with confidence?	86.74	Very Good	This is a an excellent evaluation report. It addresses the evaluation purposes and objectives and contains good assessments in response to the evaluation criteria, based on well substantiated evidence.
